THE STORY

Ahriman, the God of Chaos, has spread his black substance, the Corruption, everywhere. Seeking answers to defeat the darkness, the Prince of Persia travels to a reputed safe haven, only to find himself in an abandoned kingdom rife with dangerous challenges and adventures awaiting him at every turn.

CHARACTERS

The Prince

The Prince is all alone in a world filled with Corruption. Armed with a sword that can cause damage to corrupted creatures and a glove that allows him to perform acrobatic moves, the Prince is determined to fight the Corruption to the very last. The Prince must complete this quest to save the inhabitants and all that he holds dear – otherwise, the kingdom will be destroyed!

Zal the Magus

Zal is a dark, powerful, and mysterious character. He is partially corrupted and therefore has a mass of Corruption on the bottom half of his body.

Unknown

Is he an ally or an enemy? All we know is that he is a powerful and corrupted creature with mysterious secrets between him and Zal.

The Spirit

The Spirit is an enigmatic ancient spirit who helps the Prince and Zal in critical situations.

ENEMIES

Now that the world has been corrupted, many humans and animals are also corrupted and will stop at nothing to keep the Prince from saving the kingdom.

ITEMS

The Power Pack

The power pack allows the Prince to recover his energy.

The Upgrade Pack

The upgrade pack permanently increases health points by giving one additional life circle.

The Revival Orb

The magical orb can be very useful when the Prince fights a boss.

Gold Coins

These gold coins can be spent, and can also be very useful in gaining access to certain areas.

The solid Corruption: Zal can reach some places by solidifying corrupted surfaces or objects.

The Corruption can also be present in other forms: on enemies, items, obstacles, etc.

GAME INTERFACE

1. Health Points

Located in the left corner, the health bar indicates how many life circles the Prince has – each circle corresponds to two points. The number of life circles can be increased while progressing in the game.

If the Prince loses all his health points, he will restart at the last checkpoint encountered.

The Prince loses all his health points immediately if:

- he falls in a gap;
- he touches a mortal object (rock, saw, etc.); or,
- he comes in contact with the Corruption.

2. The Corruption Gauge

When the Corruption gauge gets full, Zal might become overwhelmed by the Corruption inside him.

3. The Map

The map provides a general view of the level and its main elements.

4. Gold Coins

See the Items section on page 8.

5. The Prince

See the Characters section on page 6.

Environment and the World Map

The world map shows all the levels in one zone that the Prince must pass to complete this zone of the game. The game has plenty of different environments for the Prince to explore, from hostile desert to deadly labyrinth.

In-game, the player can move the camera to explore the world map by touching the right and left arrows.
